Early hemi rail at the York US-30 strip

This was my first car - bought it for $35 off of this guy's grandson back in 1971. I later traded it for a box of tools, but that's another story. If I still had it, I would have to stuff an early hemi into it!

KITS FOR MODEL A FORDS

Back in 1969, with my brother at the wheel and my cousin in between, on our first Model A - at least part of one. This one was cut down by a previous owner and had a Model T worm drive truck rear installed to make a poor man's tractor. It made a lousy tractor but it was great for pulling wheelies! We paid 15 bucks for it and still have it.

BODY KITS FOR MODEL A'S:
